

By utilizing over 150 different weather descriptors, CustomWeather provides a more in-depth weather summary than other weather companies. Many of the descriptors track the weather as it progresses throughout the day. Our current conditions are updated every 30 minutes — more than twice as often as any other weather resource — and our unique rolling 48-hour detailed forecast is an invaluable planning tool by providing a level of detail that simply can't be found anywhere else. **Current Condition Reports**

Current condition reports for over 2000 locations around the world—updated every 30 minutes.

Current condition reports include:

- Current conditions descriptions
